ALL

HSE ITEMS

HAVE BEEN UPDATED

and will be placed before August the 1st!

In this edition

1. HSE ITEMS
2. AVOIDING HAND INJURIES
3. HSELIFE WORLD VIDEO CHANNEL
4. REFLECTIVE LEARNING VIDEO
5. ORDERING LIST HSE ITEMS 2017

ALL

HSE ITEMS

HSE LIFE NL 
Oil & Gas Industry standards for professionals on the shop floor

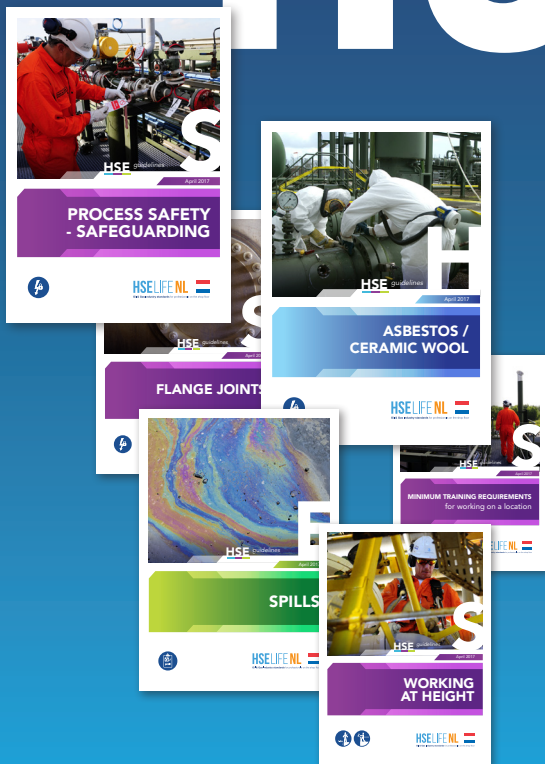

HAVE BEEN UPDATED!

All HSE items have been updated and available online by August 1st.

In addition to some general adjustments and processing of comments received last year, each folder is "summarized" in the form of a **"5 to remember"**, on the backside.

A number of items have been linked to **IOGP** guidelines. In addition to the folders, the videos and on-screen presentations are further simplified and refreshed.

Check out the **HSElife site** for the latest version and go through the folders during a toolbox meeting!

NEW FOLDER

Avoiding HAND INJURIES

AVOIDING HAND INJURIES

5 TO REMEMBER

- 1 Discuss the job and its risks **before you begin**. If you are in any doubt, **do not start work!**
- 2 Use **only the type of gloves** recommended for the task in hand
- 3 **Never touch the load with bare hands, never lift more than 20kg and always wear impact-resistant gloves**
- 4 Avoid injury by working **hands-free** as much as you can. Keep your hands out of the danger zone
- 5 Rushing your work and setting the wrong priorities ("the job has to be finished") give rise to **unnecessary risks**

IMPORTANT! If you are in any doubt, stop work and discuss the situation with the site manager or supervisor!

In collaboration with the Operators and the HSElife Contractor Forum, a new folder was made about avoiding hand injuries.

Before we make a video and on-screen presentation, we are curious about your comments.

In line with the new set up, there is also a "5 to remember" on the back of the folder.

NEW

HSELIFE WORLD VIDEO CHANNEL

For a number of months, the **HSElife WORLD Video Channel** is available to professionals on the shop floor. A new short video will be posted weekly.

HSELIFE WORLD VIDEO CHANNEL
A PART OF HSELIFE MULTIMEDIA COMMUNICATION PLATFORM

The accompanying article refers to HSElife material, the Newsletter or the Magazine, but we also post videos available in the Industry.

[watch the video channel here](#)

In the meantime videos have been posted about Resilience, Helicopter Downdraft, IOGP, Natural Gas Condensate, Reflective Learning and more.

Reflective Learning video Removing the hazards

Shell recently produced a new Reflective Learning video titled "Removing the hazards".

The video has been realised with the help and input from the **HSElife Contractor Forum**. The video clarifies the Hierarchy of Control and gives examples of how to use it in your work.

In the next HSElife Magazine we will focus on Reflective Learning and give examples of what has been done in practice with this theme.
