HSELIFE LARS 2.0
Learning and Registration System

SOFTWARE UPDATE
LARS 2.0!

After several months of hard work, we are proud to announce the release of the new and updated version of the **HSElife Learning and Registration System**

LARS has a central position in HSElife. Through LARS it is possible to access training, administrators have an overview of certification, users will be reminded of the expiration date of their certificate, etc.

LARS is also connected with external knowledge systems such as the **HSElife Academy**.

As more and more Contractors are using the HSElife platform, it is essential to make the interactive courses and their registration as easiest as possible. On the other hand, work planners, team leaders, supervisors and security personnel can see within seconds whether the required certifications are in place.

FOLLOW YOUR TRAINING
WHENEVER AND WHEREVER YOU WANT!

It's all possible with **HSElife LARS 2.0!**

TRUST BUT VERIFY!

By scanning the QR code you can verify the certifications of the users!

Watch the interactive training Onshore Induction containing all basic rules, procedures and regulations relating to HSE. Estimated time: from 5 to 60 minutes.
You haven't completed this training yet.

Learning and Registration System

HOW CAN I USE IT?

You can access HSElife LARS 2.0 in two ways: if your company has an HSElife Premium account you can access it through the hselifenl.com website. Secondly, you can purchase an Individual Single subscription - more information about these two possibilities can be found on hselifenl.com

INTRODUCING THE NEW FUNCTION: AUDIO SUPPORT!

We assist you every step of the way!

To make it easier for you, we developed several supporting documents, such as Manuals and Quickstarts for both registering and using the system. In addition, we introduce the special function called AUDIO SUPPORT. It is a handy option, which is recognizable by the "speaker" icon on the top right of the screen. Click on it and you'll hear a detailed explanation of what's required from you at that stage. **Handy indeed!**

Don't you have an HSElife account yet? Ask your Supervisor or Team leader about it!

HSE LIFE LARS 2.0
Learning and Registration System

THE TOP 10 MOST IMPORTANT UPDATES

1 User registration has been improved, so that employees can be registered faster and more easily.

2 HSElife LARS has been optimized for mobile use and is therefore fully responsive.

3 We have optimized our training modules, making it easier than ever for you to follow on-the-spot training programmes.

4 Control and easy access to the locations through QR code.

5 A special AUDIO SUPPORT function has been installed to help users during registration.

6 Signing up for training modules can now be done by groups as well as by individual users.

7 Our range of training courses has been expanded! There are, for example, 24 item training courses.

8 Thanks to increased personalization and a customized interface, the overall user experience has been further improved.

9 The system's User Account management has been improved and made more user-friendly.

10 A lot has changed at the back-end! The performance and safety levels have been raised (to comply with the legal privacy requirements, among other things), making HSElife LARS fully future-proof.
